EDUCATION

Florida International University

Bachelor of Business Administration

Major: International Business

Minor: Business Analytics

Honors Cum Laude 3.56 GPA

Miami, FL

April 2021

SKILLS

Languages:

- English, Spanish, Portuguese

Technical:

- SQL, SSIS, Microsoft Excel, Tableau Desktop, Tableau Prep, Power BI, R, Python, SQL, Spark, Azure Synapse, Azure DevOps, Power Apps, Tableau, Power BI, Agentic AI, Claude Code

Certifications:

- Google Data Analyst Certificate
- Google Cloud Digital Leader
- Tableau Desktop Specialist Certificate
- Azure Data Engineer Associate
- Claude Code in Action

PROFESSIONAL EXPERIENCE

Deloitte & Touche LLP

Remote (Virginia)

Jan 2022 - Present

Delivery Senior Consultant, AI and Analytics Solutions

- Architected and maintained data models, stored procedures, and views for large-scale data cleaning, standardization, and processing; served as data steward ensuring quality, reliability, and governance across structured and unstructured datasets
- Developed and maintained robust ETL/ELT pipelines using SSIS, Tableau Prep, and Python for data ingestion, transformation, and aggregation; drove automation and reliability improvements reducing manual intervention by standardizing workflows across teams
- Created reusable Python packages for advanced analytics and data transformation, enabling cross-functional teams to self-serve on data analysis and product feature tracking; drove widespread adoption through documentation and training
- Designed and maintained reporting dashboards and data aggregations in Power BI and Tableau supporting product feature tracking, user retention analysis, and A/B testing workflows for multiple cross-functional stakeholder groups
- Led migration of enterprise SQL Server to Azure Synapse (MPP), architecting cloud data lake infrastructure and comprehensive ETL pipelines; established data governance standards and performance optimization strategies for massive-scale structured and unstructured datasets
- Developed real-time reporting solutions supporting critical public health initiatives
- Developed applications to speed up discovery of legacy SQL objects for modernization using Visual Studio Code, Github Copilot, and Claude Code
- Served as thought partner and SME on data foundations strategy for engineering managers and leadership, communicating and shaping the data roadmap and driving a data-driven culture through self-service tooling and reliable data infrastructure
- Led cross-functional teams as project leader and lead developer, consistently delivering high-quality work products on schedule
- Provided technical mentorship, coaching, and training to data analysts, data engineers, and cross-functional partners; led knowledge transfer sessions to build organizational capability and enable data self-service across teams of varying technical acumen
- Delivered exceptional client service resulting in contract extensions, expanded project scope, and additional

engagements

- Developed project accelerators using Microsoft Power Apps, Power BI, Azure AI Foundry, and Claude Code to analyze financial data, identify discrepancies, and generate predictive forecasts
- Led nonprofit advisory program, identifying organizational needs and coordinating volunteer teams for data-driven social impact initiatives
- Provided project management support ensuring initiatives remained within scope and met critical deadlines

US Army Reserve

Miami, FL

Specialist (E-4)

2013 – 2019

- Completed monthly training requirements and annual field exercises while balancing civilian career responsibilities, demonstrating strong time management and commitment to mission readiness
- Collaborated with diverse team members to accomplish assigned tasks and objectives in high-pressure environments, consistently meeting deadlines and performance standards
- Maintained accountability for assigned equipment and resources while following established protocols and procedures, ensuring compliance with organizational standards and regulations
